

ABHINA ROSE

AI & Machine Learning Student | Frontend Developer

Angamaly, Kerala, India | abhinarose@gmail.com | +91 9400864476 | [LinkedIn](#)

PROFESSIONAL SUMMARY

Integrated M.Sc Computer Science student specializing in Artificial Intelligence & Machine Learning, with hands-on experience building responsive frontend applications using React, HTML, CSS, and JavaScript. Strong foundation in machine learning principles, deep learning architectures, and data analysis using Python, TensorFlow, and PyTorch. Experienced in full-stack development, REST API integration, and computer vision, with a project background spanning AI-powered health applications and real-time gesture recognition systems. Seeking an AI/ML or software engineering internship to apply technical and problem-solving skills to real-world challenges.

TECHNICAL SKILLS

Programming Languages: Python, Java, C++, JavaScript

Web Development: HTML, CSS, JavaScript, React

Machine Learning & AI: TensorFlow, PyTorch, Neural Networks, Reinforcement Learning, Pandas, NumPy

Backend & APIs: Node.js, Express, REST APIs

Tools & Libraries: OpenCV

Soft Skills: Teamwork & Leadership, Problem-Solving, Critical Thinking

EDUCATION

Integrated M.Sc Computer Science — AI & ML — Mahatma Gandhi University *Jun 2023 – Jun 2028*

EXPERIENCE

Frontend Developer — Xavirgin .com *July 2026 – Sep 2026*

Internship · Remote · 3 months

- Developed and maintained responsive user interfaces using HTML, CSS, and JavaScript/React, translating design mockups into functional web pages.
- Collaborated with a remote development team to build, test, and refine frontend features on Xavirgin.com.
- Applied modern frontend practices to improve UI responsiveness, page performance, and cross-browser compatibility.

Volunteer, AI Awareness Program — Naipunnya Public School *Oct 2023 – Nov 2023*

- Conducted AI awareness sessions introducing students to Artificial Intelligence concepts and future career opportunities in emerging technologies.

PROJECTS

HERIO — AI Women's Health Assistant — Node.js, Express, REST APIs

- Developed a full-stack AI-powered web application providing PCOD screening, breast health awareness, pregnancy support, and emotional wellness chat.
- Implemented secure authentication and REST API integration using Node.js and Express.
- Built a responsive UI with real-time chatbot interaction and personalized health reminders.

Gesture-Controlled Rock-Paper-Scissors Game — OpenCV, TensorFlow/PyTorch, Computer Vision, Reinforcement Learning

- Building a real-time gesture recognition system combining computer vision and reinforcement learning.
- Using OpenCV for image processing and TensorFlow/PyTorch for reinforcement learning model development.
- Developing an interactive interface for hand gesture detection and game outcome determination, targeting 90% classification accuracy.

ACHIEVEMENTS

Paper Presentation — National Seminar on Artificial Intelligence & Machine Learning *Oct 2023 – Nov 2023*

- Presented at the National Seminar on Artificial Intelligence & Machine Learning, organized by the Department of Computer Science and co-sponsored by KSCSTE.
